

GEOxyz – Data Processor - GIS Specialist

In search of a Data Processor - GIS Specialist

As a **Data/GIS Processor**, you ensure that data processing is carried out according to the company's established standards and procedures.

Your responsibilities:

- Communicate effectively and report any issues encountered during processing.
- Process data according to project specifications and correct any errors.
- Collect, understand, and interpret the data acquired by the hydrographers.
- Identify and flag data that does not meet quality criteria.
- Understand and validate reports and equipment tests prior to survey operations.
- Be responsible for all stages of data processing and ensure proper documentation.
- Create charts and maintain the database using dedicated software.
- Deliver all requested project outputs as required by the client.
- Comply with the company's health, safety, environmental, and quality procedures.

What do we expect from you?

- You hold a degree in hydrography, geography, geology, or an equivalent field.
- You have knowledge of bathymetry and the ability to quickly learn new software tools.
- You have a good understanding of geodesy, coordinate systems, and positioning systems.
- You have a good understanding or experience with MBES/SBES processing (preferably with autoclean tools).
- Basic knowledge of ArcGIS for creating databases and charts.
- Knowledge of QGIS and AutoCAD is a plus.
- You are fluent in both English and Dutch, spoken and written.
- You enjoy working in a team environment.

What do we offer you?

- A challenging position in a fast-growing company.
- A pleasant working atmosphere within a young and dynamic team.
- Opportunities for personal and professional growth within the organization.
- The chance to work on a long-term 3-year project.
- You will work with the latest high-tech equipment on various projects and locations.
