

GEOxyz – Dataprocessor

In search of a Dataprocessor

As an Autoclean Data Processor you ensure that data processing complies with the company's established standards and procedures.

Your responsibilities will include:

- The data processor communicates effectively to report any problems encountered.
- Processing the data to comply with the project specifications and correct errors.
- Collect, understand and interpret the data acquired by the hydrographers.
- Responsible for identifying data that does not meet the criteria.
- Understand and validate the reports and equipment tests prior to sounding.
- Responsible for all stages of processing and ensuring documentation.
- Comply with the company's health, safety, environmental and quality procedures.

What do we expect from you?

- You obtained a degree in hydrography, marine engineering or equivalent.
- You have at least 3 years experience in processing and interpreting marine geophysical data.
- You have knowledge of Autoclean software and the ability to learn a new software quickly.
- You have a sound knowledge of the basics of geodesy, projection systems and positioning systems.
- You speak and write fluently in English.
- You can work well in a team.
- If you have knowledge of CAD software, that is a plus

What do we offer you?

- A challenging job in a fast-growing environment.
- A good working climate within a young dynamic team.
- A competitive salary.
- The chance to actively grow within our organization.
- You will work with the newest high-tech equipment on various projects and locations.
