

# GEOxyz – Hydrographic Surveyor - Day Projects

## In search of a Hydrographic Surveyor for our day projects

As a Surveyor for our day projects, you will be responsible for:

- Preparing and planning surveys to collect data on seabed characteristics and topography.
- Calibrating and checking survey equipment to ensure accurate and reliable data collection.
- Collecting data on board our own survey vessels, including daily reporting and using various survey instruments for seabed studies.
- Performing quality checks and, if necessary, processing survey data. You will analyze and interpret data to create maps, charts, and reports.
- Supporting various projects by collaborating with colleagues to plan and execute projects safely and efficiently.
- Complying with safety procedures and ensuring a safe working environment.
- Carrying out tasks in accordance with applicable regulations and standards.

## What do we expect from you?

- You have at least one year of experience with multibeam and/or singlebeam surveys.
- You have knowledge and skills in data acquisition, processing, and interpretation (Qinsy and/or NavAQ).
- You possess a category B driving license; a BE license is a plus. If necessary, we can explore options to obtain it together.
- Your base of operations is Ostend, with a work area covering the Flemish ports (Nieuwpoort, Ostend, Zeebrugge) and the Western Scheldt (Breskens, Vlissingen, etc.).
- You have a good command of English; knowledge of Dutch is a plus.
- You have a positive team spirit and a methodical, flexible mindset with attention to detail.

## What do we offer you?

- A stable job where you work on survey vessels but return home in the evening. A workplace with the best view in Belgium, changing every day.
- An ideal role for a surveyor looking for stability and a job closer to home after international adventures.
- A challenging position in a fast-growing environment, working with high-tech equipment and contributing to innovations such as the transition to drones.
- Working in an international company with a positive work atmosphere in a young and dynamic team.
- Opportunities for active career growth within our organization.
