

GEOxyz – Project Surveyor

In search of a Project Surveyor

As a **Project Surveyor**, you act as the technical representative of the Survey department within project teams. You are responsible for maintaining technical control and ensuring that all survey activities are executed efficiently, safely, and in line with client requirements, project deliverables, and company standards. Working closely with the Project Manager and reporting to the Lead Project Surveyor, you provide technical support throughout the full project lifecycle, from preparation to execution and close-out.

Key responsibilities:

- Develop and maintain a thorough understanding of project scope, objectives, technical requirements, and deliverables
- Prepare, review, and maintain all required project survey documentation, including project execution plans, risk assessments, bridging documents, and quality and HSE plans
- Actively participate in client clarification meetings, kick-off meetings, HIRA sessions, operational meetings, and project mobilisations
- Coordinate with internal departments to ensure the correct selection and availability of survey equipment and qualified personnel
- Provide continuous technical support and guidance to offshore teams and vessels during project execution
- Support the Project Manager in survey-related contract interpretation, change management, and variation orders
- Perform quality control and technical reviews of mobilisation, operational, and field reports to ensure compliance with project and company standards
- Serve as a technical advisor within the project team, identifying risks, proposing solutions, and supporting decision-making
- Capture and document technical lessons learned and contribute to post-project evaluations and process improvements
- Provide technical input during tender and sales phases, and liaise with clients, suppliers, and subcontractors as required
- Promote and uphold QHSE standards, ensuring that identified risks are properly communicated and managed throughout the project

What do we expect from you?

- A strong technical background in survey operations and project environments
- Experience with navigation, geophysical, and subsea survey equipment and software
- Exposure to offshore projects within renewables and/or oil & gas
- Excellent command of English; knowledge of Dutch and/or French is a plus
- Strong organisational skills, attention to detail, and the ability to manage multiple priorities
- Excellent communication skills and a proactive, solution-oriented approach

- Basic knowledge of CAD/GIS software
- A continuous improvement mindset and interest in new technologies

What do we offer you?

- A challenging job in a fast-growing environment.
- A good working climate within a young dynamic team.
- The chance to actively grow within our organization.
- Working in an international company with the possibility to grow.
